PROFILE

As a future Full-Stack software engineer, I am constantly looking for software engineer opportunities to put my technical expertise to use. Committed to continuous learning and motivated to take on challenging tasks, my goal is to develop the foundation for a strong IT career through perseverance and hard work. I have a solid educational background and a strong desire to contribute to creative solutions. Additionally, I also work well in a dynamic, team-oriented workplace.

WORK EXPERIENCE

Software Engineer Internship

- Printcare PLC   2023 (Jan - June)

I obtained the practical experience and programming skills necessary to succeed in the software engineering industry during a six-month software engineering internship at Printcare PLC. I worked on significant projects, developed and implemented software solutions, and enhanced my programming skills.

- Axcertro (pvt) ltd   2024 (July - Current)

PROJECT INVOLVEMENTS

Hotel Reservation System - Website
Used HTML, CSS, JS, PHP and MYSQL
Project - https://github.com/it21067938/Hotel-Reservation-System-website

Business Web Application For Coconut Oil Factory
Used MERN stack, Java, CSS, HTML, Bootstrap and MongoDB Project -
https://github.com/it21067938/Coconut-Oil-Factory-Management

Mental Health Management System - Web Application
Used MERN stack, JS, CSS, HTML, Bootstrap, Tailwind CSS and MongoDB Project -
https://github.com/it21058882/Mental_Health_Management_System

Food App (Meal Drop) - Web Application
Used React, Spring, JS, HTML, CSS, Tailwind CSS and Firebase
Project - https://github.com/it21067938/Food-App---MealDrop
